Experience

Our Town America Jan 2026 – Present

Software Engineer (May 2026 – Present); Software Engineer Intern (Jan 2026 – May 2026) *Clearwater, FL*

- Architected an AI sales call analysis pipeline using Whisper STT, speaker diarization, and a local LLM that classifies call outcomes and surfaces the objections and talk tracks behind signed-up versus not-interested results for sales coaching
- Integrated GoHighLevel with internal software creating a marketplace app, so sales reps can work inside High Level using internal tools like AI proposal generator and DocuSign which increased sales reported by 30%
- Built REST API and webhook integrations that sync GoHighLevel with ActiveCampaign, Twilio, and the internal CRM, replacing a back and forth workflow between platforms with a single system of record
- Built internal dashboards and reporting pages using SQL, javascript, that about 50 employees rely on to track business metrics
- Served as release manager, adding automated testing to GitHub Actions CI/CD a quality gate that reduced bugs in production

Kyodo Catalog May 2026 – Present

Full Stack Developer *Remote*

- Built a B2B product catalog for 1,200 products from the client's concept owning the frontend, backend, branding, and UX/UI
- Designed and implemented the backend, including a server enforced order workflow with full status history and role based access for clients, dispatchers, and admins replacing a physical catalog and Excel spreadsheets
- Implemented authentication with Clerk, stored product images in Cloudflare R2, and deployed the app on Vercel and Railway

MiniBeast Enterprises 2026 – Present

Web Developer (Contract) *Remote*

- Reactivated push notifications for MiniBeast Official, a fitness and nutrition app, using Firebase
- Enabled PDF downloads in MiniBeast Official and updated its email templates
- Containerized MiniBeast University, a PHP/MySQL course platform, with Docker on Apache, and added cron-driven email jobs and versioned schema migrations

Computing Research Association — RARE Lab, University of South Florida Jun 2025 – Jan 2026

Research Intern *Tampa, FL*

- Co-authored *Bloom Preview: A Low-Cost LLM-Powered Social Robot*, published at **ACM/IEEE HRI '26**, by building the wake-word, speech-to-text, and text-to-speech pipeline for LLM-driven conversations
- Integrated computer vision with Dynamixel motors via pypot for head-tracking behavior on Raspberry Pi

Projects

CampusEvents | *React, TypeScript, PostgreSQL, Bun, Hono, Docker* Spring 2026

- Built a full stack event booking system with JWT authentication, role based access control, and real time ticket tracking
- Designed a PostgreSQL schema and REST API with 15+ endpoints for event management, ticket purchasing, and analytics

TheraPlay | *React, MediaPipe, Flask, Gemini API* — **1st Place, HealthHacks USF** Fall 2025

- Built a real time rehab platform tracking 25 body keypoints per frame with MediaPipe to score patient movement and generate clinical progress reports via the Gemini API

Student Well-Being Classification | *R, SPSS, NumPy, Matplotlib* — **Undergraduate Research Award, USF** Spring 2025

- Applied Latent Profile Analysis to classify 4 well being profiles from 500+ students
- Ran statistical testing (ANOVA, BIC, post-hoc Tukey) and built 15+ visualizations with NumPy and Matplotlib

Skills

Languages: TypeScript, JavaScript, Python, PHP, SQL, R, C, HTML/CSS

Frameworks & Tools: React, Node.js, Express, Prisma, Flask, Hono, WordPress, Docker, GitHub Actions, Git, Jira (Agile), Linux

Data & AI: PostgreSQL, MySQL, REST APIs, webhooks, OpenAI API, Whisper STT, LangChain, Gemini API, MediaPipe, NumPy

Languages (spoken): English (fluent), Spanish (native), Portuguese (advanced)

Education

University of South Florida Tampa, FL

Bachelor of Science in Computer Science — ***GPA: 3.9*** *Aug 2024 – May 2026*

Hillsborough Community College Tampa, FL

Associate of Arts in Computer Science — ***GPA: 4.0*** *Jan 2022 – May 2024*
